

Learn to Keyboard and Help Your School's Technology Fund!

Dear Parents:

Keyboarding is not just a convenient skill, but a required competency in today's modern world. UltraKey 5.0 is the keyboarding tutor for the 21st century. UltraKey features the finest 3D animation, computer graphics, and video designed for maximum learning. Drill and practice games are conspicuously absent from the program. While games may be fun, they don't necessarily teach anything. In fact, games can even reinforce poor typing habits because they encourage a "rush rush" attitude. UltraKey directly teaches keyboarding without pressure. It concentrates on typing well and it provides the greatest satisfaction of all by making every user a success!

Bytes of Learning operates a *Take It Home Bonus™* program that allows parents to purchase Home Editions of UltraKey 5.0 through the school for **\$19.95** per unit (regular price is \$49.95). For each unit purchased, the school earns cash to fund additional technology.

The UltraKey 5.0 Home Edition contains all the same content as the School Edition and accommodates up to 8 users. So the whole family can learn to keyboard! Each UltraKey 5.0 CD-ROM contains installers for Windows 9x, Windows 2000, WindowsMe, WindowsXP, Mac Classic and Mac OS X.

The program refunds the school when orders arrive 6+ at a time. Therefore we may wait to receive that many before mailing. Please allow at least 2-3 weeks for the software to arrive at school.
