## Summer Math

To get a in math for the week, you need to complete:
2 (or more) Activities
2 (or more) Counting Patterns and the
Allowance problem for the week

| Math Activities (complete 2 or more): |  |
| :--- | :---: |
| Tiles: <br> Solve the puzzle by placing the $0-9$ tiles on <br> the appropriate squares. | Tally each time <br> completed: |
| Blackout: <br> Solve the puzzle by placing the colored <br> circles to build the target number. All <br> spaces must be covered! |  |
| Rek-en-Rek work* |  |
| Double digit addition* |  |

*See instructions on back

## Rek-en-Rek work:

- Building numbers

Have your child build a number on the rekenrek, but without counting it out!
To build 19, they could move all 20 beads, then slide 1 back, or push over 10 , then 5 , then count on 4 more.

- Quick images

Quickly "flash" a number on the rekenrek (example: 9 on the top, 7 on the bottom), and have your child tell you what number they saw and how they know. If errors happen, say, "That was so fast! Would your answer change if you had more information?" Then show the image again (but still encourage counting 5 s or 10 s rather than 1s).

- Complete a "string" of mental addition

Have students share their strategy or "prove" thinking on the rekenrek
Here are some example "strings"; You can make up your own as well!

| $5+5$ | $10+10$ | $8+8$ | $7+7$ | $10+4$ |
| :---: | :---: | :---: | :---: | :---: |
| $6+6$ | $9+9$ | $16-8$ | $14-7$ | $14-10$ |
| $7+7$ | $8+8$ | $8+7$ | $8+6$ | $14-9$ |
| $8+8$ | $9+7$ | $15-7$ | $14-8$ | $14-4$ |
| $9+9$ | $7+7$ | $15-8$ | $14-6$ | $8+8$ |
| $7+9$ | $6+8$ | $9+9$ | $14-9$ | $16-9$ |
| $5+6$ | $4+6$ | $18-9$ | $13-6$ | $16-7$ |

## Double digit addition:

- Complete a "string" of mental addition

Encourage taking "leaps" of 10, finding landmark numbers, splitting numbers, and making tens

Here are some example "strings"; You can make up your own as well!

| $26+10$ | $43+20$ | $47+23$ | $53+30$ | $36+30$ |
| :--- | :--- | :--- | :--- | :--- |
| $26+12$ | $43+24$ | $50+20$ | $53+36$ | $36+33$ |
| $26+22$ | $43+44$ | $40+30$ | $53+46$ | $36+36$ |
| $44+30$ | $52+30$ | $37+33$ | $37+30$ | $63+20$ |
| $44+39$ | $52+39$ | $43+27$ | $37+39$ | $63+29$ |
| $58+21$ | $68+22$ | $45+25$ | $68+22$ | $48+41$ |
| $63+29$ | $68+29$ | $87+43$ | $68+29$ | $48+29$ |

## Counting! (complete 2 or more)

|  | Tally each time completed: |
| :---: | :---: |
| Count backwards from $\qquad$ to $\qquad$ |  |
| Count forwards/backwards by 2 s from $\qquad$ to $\qquad$ |  |
| Count forwards/backwards by 5s from $\qquad$ to $\qquad$ |  |
| Choose a number 1-9: $\qquad$ <br> Now count forwards by 10 s to 200 or higher |  |
| Choose a number 1-9 and add it to 200: $\qquad$ Now count backwards by 10 s to your number |  |
| Count forwards by 20 |  |
| Count forwards by 25 |  |

Challenges:

| Count forwards by 30 or 40 |  |
| :---: | :--- |
| Count forwards by 8 or 9 |  |

## Allowance!

I am encouraging you to give your child a summer allowance (). This allowance is earned by your child completing a weekly calculation of how much they are due to receive. Each week, a different amount of change is promised to them for each day, and their job is to calculate their weekly total (what you "owe" them). Once they figure out what that total is, you can give them the actual money!

If your child is stuck:

- Remind them to count the tens and get an idea of how big the number will be.
- Be their pencil: record the strategies and steps they are completing. This is very helpful for spotting errors!
- Some strategies you can suggest:
- Look for ways you can make tens!
- Count by ___ (2s, 5s, 3s, etc.)
- Are there any problems you have already solved that could help you?

If your child makes an error:

- Ask "How did you solve this?" Most often, in explaining their thinking, your child will catch their own error.

After solving (if desired):

- Share a strategy you used to mentally solve the problem; discuss what parts of your and your child's strategy were elegant or efficient.

## Allowance

Week of June 11: $14 \phi$ each day

|  | How <br> much I <br> have: |
| :---: | :---: |
| Monday | $14 \phi$ |
| Tuesday | $14 \neq$ |
| Wednesday | $14 \phi$ |
